Terms of Reference Feedback

Changes to proposed aims/objectives
— Add additional sensors, e.g. pressure sensors

Changes to project plan

Resource Issues
Ryan will provide needed resources for hardware. Possible use of Matlab for neural nets.

Other Comments

Project Change Log

Exceptionally, during the course of the project, it may be necessary to make changes to plans for your project. These might include

- Changes to the objectives that were agreed at your Terms of Reference review.
- Changes to the assessment criteria.

In these cases, the change must be agreed with your supervisor and noted by your second marker.

- Changes to your planned work that have ethical implications.

In this case, the Faculty's 'Project Amendment Request Form' (available on Blackboard) must be revised and approval sought from the original approver. (See Project Handbook for more information.)

The changes must be recorded in the log below. A brief justification for the change must also be given. The entry must be signed and dated. If more space is needed, please affix an extra page.

Please note: **You must include in the Evaluation part of your project report a detailed explanation and justification for the changes to the objectives. Failure to do this may lead to loss of marks for that part of the report.**
